

Start Up Network Kits

This year, the FCC opened a 2.5 GHz Rural Tribal Window, a unique opportunity that offers tribes in rural areas direct access to unassigned broadband spectrum.

Now it is time to purchase the equipment needed to deploy.

Teltech is your one-stop shop for network start-ups. Our established relationships with Tier One OEMs provides access to the equipment needed to set up your network along with securing the software licensing necessary to offer broadband service to your tribal community.

Once you've acquired your Teltech Network Start-Up Kit, our partnership with non-profit MuralNet and local contractors can assist with installation. To complete the Kit, Teltech can provide ongoing network support.

**COMPLETE NETWORK KITS ARE AVAILABLE NOW
AND READY TO SHIP!**
