

Smart Solutions for Government Modernization Strategies

**Design, Build,
Automate, Simplify**

For more than 20 years, Teltech Communications LLC, dba Teltech Group, has provided clients with secure and compliant end-to end supply chain solutions. We have quickly grown from a GSA Information and Technology Supplier to supporting large Department of Defense (DOD) prime contractors as part of DOD's distribution modernization strategy to design, build, and automate equipment around simplified processes. Teltech's supply chain management experience, proprietary technologies, and staff augmentation services play a vital role by providing the high-quality, efficient, and secure support that local, state, and federal government initiatives demand. Since Teltech is a certified Native-American and woman owned business, the Congress-sponsored Indian Incentive Program provides a 5 percent rebate to prime contractors on the total subcontracted with us.

Choosing Teltech as a Teaming Partner is Easy

About Teltech

Teltech Communications LLC, dba Teltech Group, solves business challenges surrounding network asset management, warehousing and forward/reverse logistics, personnel expertise/shortages and practical utilization of evolving technologies. Since 1999, Teltech Group has successfully operated in the telecommunications industry and that legacy experience has led the way for work and success in other industries. We understand the need to bring simple solutions to complex challenges. Our diverse team of industry veterans offer clients the expertise to transform networks, manage assets, implement new smart technology and provide alternative cost-effective solutions. Built upon a tradition of "doing it right the first time" and tackling challenges that fit our capabilities, Teltech Group creates solutions for today and tomorrow's business challenges. Teltech Group is Native American and woman-owned, headquartered in Frisco, TX and has locations across the US.
