

NTIA Tribal Kits

On June 3, the U.S. Government announced the availability of nearly \$1 billion in U.S. Department of Commerce's National Telecommunications and Information Administration (NTIA) grants to expand broadband access on Tribal lands.

Now is the time to start work on your NTIA grant

Teltech was founded in 1999 and is a **certified Native American and woman-owned business**. Our mission at Teltech is to assist the Tribal Lands in broadband deployment to improve the quality of life and incite economic growth in their Native American communities. Teltech and our partners have worked with numerous tribal communities to provide comprehensive broadband solutions.

Teltech is your one-stop shop for network designs and deployments. Our established relationships with Tier One OEMs provides access to the equipment needed to set up your network along with securing the software licensing necessary to offer broadband service to your tribal community. Once you have acquired your Teltech Network Tribal Kit, our partnership with non-profit MuralNet and local contractors can assist with deployments and network integration.
